25X1 * [redacted] Comment. The shipments listed in the report are connected with the grain import program of the Soviet Zone of Germany, which was started on 11 January 1952. As has been observed to date, grain shuttle trains [redacted] operate through Frankfurt/Oder, [redacted] via Guben. Grain shuttle trains [redacted] operate through Kuestrin-Kietz. However, no such trains were observed during the reported period. A total of 4,632 freight cars of grain entered the Soviet Zone of Germany in March. On the assumption that each of the cars was loaded with an average of 15 tons, this would result in a total of 69,480 tons imported during this month. According to another report, the grain import for the month of March was set at 45,000 tons.

In February, grain imports fell 36,745 tons short of the fixed quota. The grain shuttle trains dispatched to Fuerstenberg will probably be transloaded to ships [redacted]
